Security Summary

Market Index Certificate Services is committed to providing a protected environment to ensure both complete data integrity and the highest level of data information security. Below is a list of frequently asked questions and answers. If this section does not answer your questions, please contact us by email at mics@bdfs.com or phone at 888-840-8787, Monday – Friday, 8 am to 5 pm (central time).

How does Market Index Certificate Services (MICS) ensure that information is kept secure?

MICS uses a 2048-bit Secure Socket Layer (SSL) encryption to protect private data transmitted across the Internet. BFS uses 2048-bit SSL encryption and private keys from Comodo CA Limited. Comodo's SSL encryption verifies the site user's authenticity and encrypts data as it is transferred to the user's computer each time a new screen is accessed.

Does Market Index Certificate Services (MICS) have a secure hosting environment?

A secure, state of the art hosting environment is provided by Eccentric Hosting. Eccentric Hosting is a tier-1 web hosting company located in Cedar Falls, IA and Bettendorf, IA. The database and all website information is backed up daily and stored off-site, along with weekly backups for the previous month.

What browser is required to operate within the Market Index Certificate Services (MICS) website?

To log in to the secure section of this site, you will need to use a minimum browser version of Microsoft® Internet Explorer 6. We support both 128-bit encryption and 40-bit encryption.

PLEASE DIRECT ANY QUESTIONS OR COMMENTS ABOUT THIS NOTICE TO LISA SMITH AT 1-888-840-8787.
